READY TO UPGRADE TO PFAS-FREE FOODWARE?

Your current supplier may already offer PFAS-free alternatives.

Switching can help your business:

- Reduce PFAS exposure concerns
- Support your sustainability goals
- Respond to customer demand for safer alternatives

Dear [*supplier contact*],

We're interested in transitioning to compostable, PFAS-free foodware.

Do you offer products comparable to our current foodware that are:

- BPI Certified compostable, **or**
- PFAS-free (independently tested and/or third-party verified)

We'd also be interested in product samples, if available.

Thanks,
[Your name]

KEY QUESTIONS FOR YOUR SUPPLIER:

How would switching to PFAS-free products affect pricing, availability, delivery schedules, or contract terms?

How often do prices fluctuate, and are there any minimum order requirements?

Are there any supply constraints or lead times we should plan for?
